

Importing Savvius Dashboards Into An Elk Server

Here are the steps to import the custom Savvius Dashboards into a remote Elk Server:

1. Log in to the Insight Support Portal at <https://insight.savvius.com>.
2. Go to the "Download the Apps" menu and select "Get Savvius Dashboards for ELK."
3. Extract the dashboards.json file from the archive.
4. Using a web browser, connect to the machine running the Elk Server:

5. Navigate to Settings > Objects.
6. Click Import.
7. Navigate to the dashboards.json file.
8. Click Open.

Once the dashboards are imported into either an Insight device or a remote ELK server, they can be accessed from a web browser with the URL - [https://\[ELK-IP\]:8443](https://[ELK-IP]:8443)
